

## PREAMBLE

It is a well established fact that interaction between scientific community helps in promoting good quality research. The effects become more pronounced if this interaction takes place between the young research scholars, who just enter the field, and those experienced scientists who have given their life time to research innovations. National Centre of Excellence in Physical Chemistry, University of Peshawar is going to organize a "Research Poster Symposium" aimed to bring different disciplines of science under one umbrella and to provide a golden opportunity to the researchers and particularly M.Sc, MS, M.Phil and Ph.D. scholars to interact and discuss innovative ideas.

## OBJECTIVES

To highlight the importance of new advancements in the science and allied science disciplines.

To identify the road map for the implementation of these technologies in industrial and domestic use.

To promote collaboration between academic institutions and research centers.
